

Gabriel Pompilius

Senior Product Designer

Detroit, MI · gabepompilius@gmail.com

SUMMARY

Senior Product Designer with expertise in Human-Computer Interaction and 10+ years experience helping product teams design emerging technologies to solve real-world problems. Currently the sole product designer at May Mobility, leading 0-to-1 design across autonomous vehicle fleet operations tools and customer-facing products.

EXPERIENCE

May Mobility

Senior Product Designer

Ann Arbor, MI · 2021 – Present

- Sole product designer at the company. Established the design practice and led 0-to-1 work across the internal and external product portfolio for May's autonomous vehicle fleet.
- Designed remote assistance and fleet monitoring software from the ground up, reaching a 4:1 vehicle-to-operator ratio for all fleet operations.
- Designed a route editing tool that enables one operator to update road closures in minutes, replacing a multi-person communication chain that took hours.
- Designed the in-cabin passenger UI for May's Toyota Sienna autonomous vehicles, defining the rider experience from boarding through drop-off.
- Led design for an internal-use ride-hail app supporting demos and internal testing. Unlocked the ability for site visitors to book their own end-to-end autonomous rides without staff intervention, streamlining the process and freeing up personnel.

Ford Autonomous Vehicles

Product Designer

Detroit, MI · 2019–2021

- Led design for Ford's iOS ride-hail app used to test end-to-end capabilities with Argo AI autonomous vehicles.
- Refactored an inherited custom UI to standard iOS UIKit components, simplifying development and keeping the app adaptable as priorities shifted between launching a consumer ride-hail service and demonstrating AV technology.
- Designed an e-commerce web app for a research program studying users' willingness to walk to autonomous vehicle delivery points, providing insight that guided pilot programs in three cities in partnership with Walmart.

Cengage Learning

UX Designer

Detroit, MI · 2017–2019

Promoted from UX Design Intern (2016–2017)

Led design for a web app that uses machine learning to align educational content with K-12 curriculum standards, helping educators ensure lesson content supports state curriculum requirements.

Gabriel Pompilius

University of Michigan

Web Designer

Ann Arbor, MI · 2015–2016

Migrated 60 academic department websites to a new university-wide CMS, unifying information structures, visual presentation of assets, and interaction patterns, while maintaining the desired look and feel of legacy websites for department stakeholders.

NOTABLE SKILLS

General — Proven teamwork and cross-discipline collaboration

Software — Claude Code, Figma, Adobe Illustrator & Photoshop

Research — User interviews, Usability testing, Quantified usability scoring
